

Waterproofing Roof Balcony Garden

PROBLEM:

Old structure with roof top garden area had problems with water penetrating the surface, causing considerable water damage to the units below.

SOLUTION:

Repair concrete cracks, add screed to areas to create fall, then securely waterproof membrane the balcony. Finally coat the surface with a hard wearing colour coating.

PRODUCTS:

Microl 200 Waterproofing membrane, fibreglass matting, Sika Mono Tpo 615HB, Decracoat durable floor coating
