

### **Section 1. Identification**

GHS product identifier MEMBRANE	:	MICRAFLEX - WATERPROOFING
Product type	:	Liquid
Relevant identified uses o	<u>f the su</u>	ibstance or mixture and uses advised against: not applicable
Supplier / Manufacturer	:	Concrete Protection Pty Ltd 155 Barkly Avenue Burnley, Victoria. 3121 Australia
Telephone no.	:	+ 61 3 9429 3377
Fax no.	1	+ 61 3 9427 0745
Emergency telephone no.	:	+ 61 1800 033 111
Section 2. Hazards Ide	ntifics	ation
Classification of the		
	:	Not classified
Classification of the substance or mixture <u>GHS Label elements</u>		Not classified
Classification of the substance or mixture <u>GHS Label elements</u> Signal word		Not classified No signal word
Classification of the substance or mixture <u>GHS Label elements</u>		Not classified
Classification of the substance or mixture <u>GHS Label elements</u> Signal word Hazard statements <u>Precautionary Statements</u>	:	Not classified No signal word No known significant effects or critical hazards
Classification of the substance or mixture <u>GHS Label elements</u> Signal word Hazard statements		Not classified No signal word
Classification of the substance or mixture <u>GHS Label elements</u> Signal word Hazard statements <u>Precautionary Statements</u>	:	Not classified No signal word No known significant effects or critical hazards Read label before use. Keep out of reach of children. If medical advice is needed, have product container

Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Not applicable ŝ Other hazards which do

not result in classification : No signal word

ŝ

**Storage** 

**Disposal** 

## Section 3. Composition / information on ingredients

Substance / mixture :	Mixture
Other means of identification:	Not available
CAS number / other identifiers	

CAS number / other	Identifiers	
CAS number	:	Not applicable
EC number	:	Mixture
Product Code	:	Not applicable

Ingredient name	%	CAS number
Co-polymer binder	10-30%	None allocated
Inert pigments	30-60%	various
Water	>30%	Not available
Other non-hazardous ingredients	<5%	Not applicable

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in section 8.

Section 4. First-a	id measures		
Description of necessary first aid measures			
Eye contact	: Immediate flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.		
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.		
Skin Contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.		
Ingestion	: Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of wate to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.		

## Most important symptoms / effects, acute and delayed

Potential acute health effe	<u>cts</u>	
Eye contact	:	No known significant effects or critical hazards
Inhalation	:	No known significant effects or critical hazards
Skin Contact	:	No known significant effects or critical hazards
Ingestion	:	No known significant effects or critical hazards
Over-exposed signs / sym	ptoms	
Eye contact	1	No specific data
Inhalation	1.00	No specific data
Skin Contact	1	No specific data
Ingestion	:	No specific data
Indication of immediate m	edical a	attention and special treatment needed, if necessary
Notes to Physician	:	Treat symptomatically. Contact poison treatment specialist
	immed	diately if large quantities have been ingested or inhaled.
Specific treatments	:	No specific treatment
Protection of first-aiders	:	no action shall be taken involving any personal risk or without
	suitab	le training.

See toxicological information (Section 11)

#### Section 5. Fire-fighting measures **Extinguishing media** Suitable extinguishing media: Use an extinguishing agent suitable for the surrounding fire Unsuitable extinguishing media: None known Specific hazards arising from the chemical ÷. In a fire or if heated, a pressure increase will occur and the container may burst. Hazardous thermal decomposition products ÷. Decomposition products may include the following materials: Carbon dioxide Carbon monoxide Metal oxide / oxides **Special protective actions** Promptly isolate the scene by removing all persons for fire-fighters ŝ, from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. **Special protective** equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and

self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

Personal precautions, protective	equipment and emergency procedures		
For non-emergency			
personnel :	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.		
For emergency responders :	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non- emergency personnel"		
Environmental precautions :	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution.		
Methods and materials for containment and cleaning up			

Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	<ul> <li>Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non- combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</li> </ul>

## Section 7. Handling and Storage

# Precautions for safe handlingProtective measures:Put on appropriate personal protective equipment

Advice on general			
occupational hygien	e :	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored or processed. Workers should wash hands and face before eating, drinking or smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.	
Conditions for safe			
Storage, including a	ny		
Incompatibilities	:	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.	

# Section 8. Exposure controls / personal protection

<u>Control parameters</u> Occupational exposure limits:		none	
Appropriate engineering controls	:	Good general ventilation should be sufficient to control worker exposure to airborne contaminants	
Environmental exposure			
controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers. Filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Individual protection meas	ures		
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, drinking, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	

:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side shields.
:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
:	Personal protective equipment for the body should be selected based on the task being performed and the risk involved and should be approved by a specialist before handling this product.
:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
:	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

# Section 9. Physical and Chemical properties

<b>Appearance</b>		
Physical state	:	Liquid
Colour	:	Grey
Odour	:	Characteristic
Odour threshold	:	Not available
рН	:	Not available
Melting point	:	Not available
Boiling point	:	Not available
Flash Point	:	Closed cup: Not applicable
Burning time	:	Not applicable
Burning rate	:	Not applicable
Evaporation rate	:	Not available

Page 7 of 11 MICRAFLEX

Flammability (solid, gas) Lower and upper explosive	:	Not available
(Flammable) limits	:	Not applicable
Vapour pressure	:	Not applicable
Vapour density	:	Not available
Density	:	- 1.35 g/cm <sup>3</sup> (23° C)
Solubility	:	Not available
Solubility in water	:	Not available
Partition coefficient;		
n- octanol / water	:	Not available
Auto-ignition temperature	:	Not applicable
Decomposition temperature	re:	Not available
SADT	:	Not available
Viscosity	:	Not available

#### Section 10. Stability and reactivity Reactivity ŝ, No specific test data related to reactivity available **Chemical stability** 2 The product is stable **Possibility of hazardous** reactions Under normal conditions of storage and use, hazardous ŝ, reactions will not occur **Conditions to avoid** No specific data ŝ, Incompatible materials 2 No specific data Hazardous decomposition

Under normal conditions of storage and use,

hazardous decomposition should not be produced.

### **Section 11. Toxicological information**

ŝ,

Information on toxicological effects				
Acute toxicity	:	Not available		
Irritation / Corrosion	:	Not available		
Sensitisation	:	Not available		
Mutagenicity	:	Not available		
Carcinogenicity	:	Not available		
Reproductive toxicity	:	Not available		
Teratogenicity	:	Not available		

**Products'** 

## Specific target organ toxicity (single exposure)

Name	Category	Route of	Target organs

## **Section 12. Ecological information Toxicity** Not available 2 **Persistence and** degradability 2 Not available **Bioaccumulative potential** : Not available **Mobility in soil** Soil / water partition Coefficient (Koc) : . . . Not available Other adverse effects 2 No known significant effects or critical hazards

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licenced waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
