

2018

Wishing everyone a successful year

Some of our plans and changes which could be of interest:

- ❑ Resume the Training Nights, combining theory and practice. The schedule at this stage is February, April, July and October with a different topic theme. A separate communique will provide details as the time gets closer.
- ❑ We have started to update our product brochures to reflect compliant information, plus introduce new SDS in the Global Harmonised System format to replace the old MSDS's. Details on the web site.
- ❑ With the new technology for credit card transactions, we can now accept AMEX payments. For those customers who are chasing points, we hope this provides a benefit.
- ❑ A reminder to account customers that you can order online. On the web site, go to "Sales" and complete the details. We will prepare the order for you the next day.
- ❑ Sika will continue to provide strong support. New information to be communicated.
- ❑ For people who don't have a copy of the Standards. We have prepared an interpretations of AS3740 and AS4654.2, plus reference to Below Ground BS8102. All available from the web site.
