

Successful Training Night: - “Wet Areas Mandatory Inspections Impact”

The night was targeted to builders who are supervising Bathroom waterproofing.

The new Victorian Building Regulations 2017 is due to be enforceable around June 2018. Part of the new Regulations is the requirement for additional Mandatory Inspections for Wet Areas by Building Surveyors.

The meeting covered compliance under NCC with reference to AS3740, particular awareness of the require two inspections. One to inspect the substrate is compliant; second, to inspect the waterproofing application. A check list of what to look for was provided. Special note: to ensure that accurate paperwork reference is required, particularly in proving DFT – dry film thickness and compliant waterproofing materials AS4858.

Anyone wishing an more information contact david@conpro.com.au

Vlad and Warren from Sika prepared product presentations focusing on Sikalastic 1K and SikaTite WPU membranes

Practical product demonstrations were conducted which covered mixing, different applications and a feel for product thickness.

Future Training Night events:
Tuesday 24th April
Tuesday 24th July
Tuesday 23rd October
