

CEMENTITIOUS GROUTS

Sika Grout® - HES

High Early Strength Grout

A ready mixed, high quality, grout that sets rapidly with high early strengths.

HES is a blend of high alumina cement, selected and graded aggregates, plus Sika admixtures to enable high strengths in a short time frame.

Sika Grout® - 212

Performance Pouring Grout

A blend of Portland cement, carefully selected graded aggregates with Sika admixtures to enable high strengths in short times. 212 is suitable for grouting fixing bolts and anchors / bedding machinery. > 70 MPa

Shrinkage compensated. > 70 MPa

Sika Grout® Deep Pour

Performance Deep Pour Grout > 500mm

A blend of Portland cement, carefully selected graded aggregates with Sika admixtures to enable high strengths in short times for deep pours up to 500mm.

Shrinkage compensated. > 70 MPa

REPAIR MORTARS

Sika Mono Top® 352

Light Weight Structural Repair Mortar

A 1- component, polymer modified, fibre reinforced, low shrinkage light weight structural repair mortar with corrosion inhibitor. Ideal for vertical repairs.

Sika Mono Top® 612

High Compressive Strength Mortar—70MPa

A cement-based, one component, low permeability concrete repair mortar, containing silica fume and polymer. Compressive Strength—70 MPa. Trafficable horizontal repairs.

Sika Mono Top® 723

Fairing Mortar— 5mm to feather edge

A polymer modified surface/finishing mortar, ready to mix, ideal fairing compound up to 5mm to feather edge. Finishes >30 MPa. Trafficable finish.
