

# DRAINAGE CELL

## Benefits

- efficiently drains excess water while retaining an optimum moisture level - ideal for promoting plant growth in planter box and roof garden applications
- simultaneously reduces urban flooding and conserves water resources
- the permeable modules can be installed horizontally or vertically and are easily configurable to meet project specifications
- faster installation than traditional drainage systems
- structurally engineered to be used in drainage-critical applications such as planter boxes and roof gardens
- manufactured from recycled, hard-wearing polypropylene, the product is indefinitely resistant to chemical and bacterial attack for long-term service
- ideal for sports fields, civil works, retaining walls, bio-filtration, groundwater recharge and general landscape applications

## Retaining Walls

30mm Drainage Cell

Height	30mm
Width	500mm
Length	600mm
Colour	Black
