EC-101 DEGREASER

Removes body oils, fats, sun tan lotions from the walls and floors of a swimming pool. It is an integral part of the preparations prior to repainting.

EC101 Degreaser for Cleaning your Pool Surface

- **EC101** is a heavy duty alkaline based degreaser. Used for **cleaning scum, body oils and suntan lotions** from your **pool surface**. Usually applied before an acid wash, acid does not cut through oils as well as a heavy duty degreaser.
- **Environmentally friendly.** Contains no acids and is non caustic.
- **Supplied as a concentrate** and is normally diluted for different uses, such as **cleaning Swimming Pools, Ponds, Garage floors, Drive Ways, Car Engines** and more. In some cases, EC-101 may be used undiluted or in an only marginally diluted form. (Degreasing of engines, soaking of oily machinery)
- Available in 25 Litres and 5 Litres.

AREAS OF USE

- Pathways and walkways surrounding pools.
- Degreasing of pool interiors prior to painting.
- General cleaning of floors and walls
- Heavy use degreasing of machinery and engines
- Cleaning of vinyl flooring and upholstery.
- Effective cleaning of kitchen areas and equipment.
- Cleaning of bathroom areas.
- Can be used in conjunction with steam and/or pressure cleaners.
