Page 1 of 12 CONTEC FLEX - Part B - 2023 S

Section 1. Identification

GHS product identifier	:	CONTEC FLEX – Part B
Product type	:	Solid (Powder)
Relevant identified uses of	of the s	ubstance or mixture and uses advised against: not applicable
Supplier / Manufacturer	:	Concrete Protection Pty Ltd 155 Barkly Avenue Burnley, Victoria. 3121 Australia
Telephone no. Email	:	+ 61 3 9429 3377 info@conpro.com.au

Section 2. Hazards Identification

Emergency telephone no. : + 61 13 11 26

Classification of the substance or mixture	:	Skin corrosion/irritation – Category 2 Serious eye damage / irritation – Category 1 Specific target organ toxicity – single Exposure – Category 3 (Respiratory system)
GHS Label elements Hazard pictograms	:	
Signal word Hazard statements	:	Danger H315 Causes skin irritation H318 Causes serious eye damage H355 May cause respiratory irritation
<u>Precautionary Statements</u> General	:	Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.
Prevention	:	P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray P264 Wash skin thoroughly after handling P271 Use only outdoors or in well-ventilated area P280 Wear protective gloves/ eye protection/ face protection

Response	:	 P302 + P352 IF ON SKIN: wash with plenty of soap and water P304 + P340 + P312 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. P305 + P351 + P338 + P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. P332 + P313 If skin irritation occurs: Get medical advice/ attention. P362 Take off contaminated clothing and wash before reuse.
Storage	:	Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. P403 + P233 Store in well-ventilated place. Keep container tightly closed P405 Store locked up.
Disposal dispos	: al plant.	P501 Dispose of contents/ container to an approved waste
Other hazards which do not result in classification		No signal word

Section 3. Composition / information on ingredients

Substance / mixture Other means of ident	: ification:	Mixture Not available
CAS number / other i	dentifiers	
CAS number	:	Not applicable
EC number	:	Mixture
Product Code	:	000000

Ingredient name	%	CAS number
Quartz (SiO2)	<60%	14808-60-7
Cement, Portland, chemicals	<20%	65997-15-1
+/- tartaric acid	<20%	87-69-4
Sodium carbonate	<10%	467-19-8

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in section 8.

Section 4. First-aid measures

Description of necessary	/ first aid	measures
Eye contact	:	Immediate flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin Contact	:	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion	:	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important sympto Potential acute health e		ts, acute and delayed
Eye contact	:	Causes serious eye irritation
Inhalation	:	May cause respiratory irritation/ coughing
Skin Contact	:	May cause skin irritation/ Dermatitis
Ingestion	:	Irritation to mouth, throat and stomach
<u>Over-exposed signs / s</u>	<u>ymptoms</u>	
Eye contact	:	 Adverse symptoms may include the following: Pain or irritation Watering redness
Inhalation	:	Adverse symptoms may include the following: respiratory tract irritation coughing nausea or vomiting headache drowsiness / fatigue dizziness / vertigo unconsciousness
Skin Contact	:	Adverse symptoms may include the following:irritationredness

Indication of immediate m	edical attention and special treatment needed, if necessary
Notes to Physician	: Treat symptomatically. Contact poison treatment specialist
	immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment
Protection of first-aiders	no action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media Suitable extinguishing media: Unsuitable extinguishing media: Specific hazards arising	Use an extinguishing agent suitable for the surrounding fire None known
from the chemical :	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal	
decomposition products :	 Decomposition products may include the following materials: Carbon dioxide Carbon monoxide Metal oxide / oxides
Special protective actions	
for fire-fighters :	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters :	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures		
For non-emergency		
personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders :	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non- emergency personnel"
Environmental precautions :	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution.

Methods and materials f	or conta	inment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non- combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and Storage				
Precautions for safe har	dling			
Protective measures	:	Put on appropriate personal protective equipment. Avoid dust formation. Provide appropriate exhaust ventilation		
Advice on general				
occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored or processed. Workers should wash hands and face before eating, drinking or smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Do not breath vapours/ dust. Do not get in eyes, on skin, or on clothing		

Conditions for safe Storage, including any Incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls / personal protection

2

<u>Control parameters</u> Occupational exposure limits	5:	Quartz (SiO2) TWA: 30mg/m3 Total TWA: 10mg/m3 Respirable Dust Cement, Portland, chemicals TWA: 50 million particles /cubic foot (dust) TWA: 1mg/m3 (respirable fraction)
Appropriate engineering controls :		Good general ventilation should be sufficient to control worker exposure to airborne contaminants
Environmental exposure controls :		Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers. Filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measure Hygiene measures :	es.	Wash hands, forearms and face thoroughly after handling chemical products, before eating, drinking, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye / face protection :		Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If

contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side shields.

Skin protection Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risk involved and should be approved by a specialist before handling this product.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and Chemical properties

Appearance		
Physical state	:	Powder
Colour	:	grey
Odour	:	Characteristic
Odour threshold	:	Not available
рН	:	Not available
Melting point	:	Not available
Boiling point	:	Not available
Flash Point	:	Closed cup: Not applicable
Burning time	:	Not applicable
Burning rate	:	Not applicable
Evaporation rate	:	Not available
Flammability (solid, gas)	:	Not available
Lower and upper explosive	е	
(Flammable) limits	:	Not applicable

Vapour pressure Vapour density Density Solubility	:	Not applicable Not available - 1.8 g/cm ³ (20° C) Not available
Solubility in water Partition coefficient; n- octanol / water	:	< 10 gm/ litre
Auto-ignition temperature Decomposition temperatur	: :e:	Not applicable Not applicable
SADT Viscosity	:	Not available Not available

Section 10. Stability and reactivity

Reactivity Chemical stability	:	No specific test data related to reactivity available The product is stable
Possibility of hazardous reactions reactions will not occur	:	Under normal conditions of storage and use, hazardous
Conditions to avoid Incompatible materials	:	No specific data No specific data
Hazardous decomposition Products'	:	Under normal conditions of storage and use, hazardous decomposition should not be produced.

Section 11. Toxicological information

Information on toxicological effects 2

Acute toxicity

Product / ingredient name	Result	Species	Dose	Exposure
(+)- tartaric acid	LD50 Dermal	Rabbit	>5001 mg/kg	-
	LD50 Oral	Rat	>2001 mg/kg	-

Irritation / Corrosion	:	Not available
Sensitisation	:	Not available
Mutagenicity	:	Not available
Carcinogenicity	:	Not available
Reproductive toxicity	:	Not available
Teratogenicity		Not available

Specific target organ toxicity (single exposure)

Name	Category	Route of	Target organs
		exposure	
Tartaric acid, quartz, cement, chemicals	Category 3	Not applicable	Respiratory system

Specific target organ toxicity (repeated exposure)

Not available

Aspiration hazard

Name Result				
Tartaric acid, quartz, cement, chemicals				
r anano aciu, quanz, cement, chemicais			ASPIRATION HAZARD – Category 1	
Information on the likely				
Information on the likely				
routes of exposure	:	Not available		
Potential acute health ef	ffects			
Eye contact	:	Causes serious eye irrit	tation	
Inhalation		•	ous system (CNS) depression.	
			or dizziness. May cause respiratory	
		irritation		
Skin contact		Causes skin irritation		
Ingestion			ous system (CNS) depression.	
3		Irritating to mouth, throa	• • • •	
Symptoms related to the	e physic	al, chemical and toxicolo	ogical characteristics	
Eye contact	:	Adverse symptoms may	y include the following:	
		 Pain or irritation 		
		 Watering 		
		redness		
Inhalation		Adverse symptoms may	v include the followina:	
		 respiratory tract 	-	
		 coughing 		
		 nausea or vomit 	ling	
		 headache 		
			iquo	
		drowsiness / fat	-	
		 dizziness / vertigon 	-	
		 unconsciousnes 	S	
Skin contact	:	Adverse symptoms may	y include the following:	
		 irritation 		
		 redness 		
Ingestion	:	No specific data		

<u>Short term exposure</u> Potential immediate effec	ts:	Not available
Potential delayed effects	:	Not available
Long term exposure		
Potential immediate effect	ts:	Not available
Potential delayed effects	:	Not available
Potential chronic health e	effects	
General	:	No known significant effects or critical hazards
Carcinogenicity	:	No known significant effects or critical hazards
Mutagenicity	1.0	No known significant effects or critical hazards
Teratogenicity		No known significant effects or critical hazards
Developmental effects		No known significant effects or critical hazards
Fertility effects	:	No known significant effects or critical hazards
Numerical measures of to	<u>oxicity</u>	
Acute toxicity estimates		Not available

Section 12. Ecological information				
Toxicity	:	(+)- tartaric acid: Toxicity to fish: LC50: > 100mg/l : exposure 96 hrs Toxicity to daphnia etc. LC50: 93.3 mg/l: exposure 48 hrs		
Persistence and degradability	:	Not available		
Bioaccumulative potential	:	Not available		
<u>Mobility in soil</u> Soil / water partition Coefficient (Koc)	:	Not available		
Other adverse effects	:	No known significant effects or critical hazards		

Section 13. Disposal considerations

Disposal methods	:	The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licenced waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff
		product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

Regulation	UN number	Proper shipping name	Classes	PG*	Label	Additional information
ADG	Not regulated		-	-		-
ADR	Not regulated		-	-		-
IMDG	Not regulated		-	-		-
ΙΑΤΑ	Not regulated		-	-		-

PG* : Packing group

Section 15. Regulatory information

Safety, health and environmental regulations specific for the product :

No known specific national and/or regional regulations applicable to this product

Standard Uniform Schedule of Medicine and Poisons Not regulated

Control of Scheduled Carcinogenic Substances					
Australian inventory (AICS):	All components are listed or exempted				
EU Classification :	Not classified				
HCS Classification :	Carcinogen, target organ effects				

Section 16. Other information

<u>History</u> Date of Printing Date of issue / Date of revision Date of previous issue	:	5/10/2021 5/10/2021 No previous validation
Version	:	1
Key to abbreviations	:	ATE = Acute Toxicity Estimate BCF = Bioconcentration Factor GHS = Globally Harmonized System of classification IATA = International Air Transport Association IBC = International Air Transport Association IBC = International Marine Dangerous Goods LogPow = logarithm of the octanol/water partition coefficient MARPOL 73/78 = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978 (Marpol = marine pollution) UN = United Nations
